SUMMARY

I am a **self-taught full-stack developer** with a passion for building dynamic and efficient applications. Alongside coding, I love **creative designing**, always striving to craft visually appealing and user-friendly experiences. Currently pursuing a Bachelor's degree in Computer Science, I am continuously expanding my knowledge and refining my skills. Beyond tech, I enjoy reading books that spark curiosity and broaden my perspective. I also practice calisthenics, pushing my limits both physically and mentally. With an ever-curious mind, I love exploring new ideas, technologies, and creative possibilities.

EDUCATION

Bachelors in Computer Science

Unversity Of Management And Technology

📅 2022 - 2026   📍 Lahore, PK

GPA

3.04 / 4.0

EXPERIENCE

Currently, I have no real-time experience, but I create large clone projects for learning. I'm constantly improving my skills and looking forward to gaining hands-on experience with real-world projects.
